

SAFETY COMMITTEE MINUTES

Nebraska Central Railroad Co.

Safety Committee Meeting

Thursday July 19th, 2018

Norfolk Downtown Office @1100

PRESENT: Taylor Kelley, Eldon Vohs, Anthony Benda, Shannon Brunner, David Collis, Eric Olsufka

Guests: Bryant Smith

(Those shown in bold print were present)

DAYS INJURY FREE= 1207

DAYS SINCE LAST HUMAN FACTOR INCIDENT= 12

AGENDA

LAST MEETING MINUTES OVERVIEW

- The committee looked at the action items to be completed from the last meeting and safety firsts reports that had been turned in.
 - The Committee talked about the PPE vending machines and how that's going at all locations. The machines are getting stocked with more and more supplies and we appreciate all the feedback during this process.
 - An action item that is being completed by the Mechanical Department is the movement of the locomotive horns. So far four locomotives have had the horns moved backed further on the locomotives and now they'll be on the conductor side. We appreciate the hard work of the mechanical department on this and David Collis gave us the update.

OPERATIONAL TESTING FAILURES AND MEMBER OBSERVATIONS:

- Committee members went over observations they made in the field and everything was kept anonymous.

ROUNDTABLE TOPIC DISCUSSION:

- **Summer Awareness/ Summer Spike**
 - As a group we discussed how the Summer has been going to this point. We talked about supplies being stocked and what we can do the rest of the season to ensure we work safely.
 - The committee talked about working through the rest of the Summer Spike Season injury free. If we can reach this goal through Labor Day we will have an end of the Summer party at Columbus. More details will come later, but the Safety Committee really stressed working safely and staying hydrated throughout the Summer Spike period!
- **New Rules Binders**
 - The committee talked about the new rules binders that will be getting passed out for all crafts at the NCRC. These new books will eliminate the black rules binder and the second binder with all the general orders. Everything now will be consolidated into one binder with two sides to it.
 - RGPC is almost completed with our own set of Safety Rules and Air Brake rules which will be in the new books and passed out in the upcoming weeks.
- **New Safety Committee Members**
 - This was the final meeting with this group of NCRC Safety Committee members. We thanked everyone for their participation and positive roles on influencing a strong safety culture at the NCRC.
 - The New Committee member's selected by the Committee are: Jeremy Moss and Pat Augustine out of Transportation, Cameron Schmuecker from Signal, Pat Hilliard from Mechanical and MOW TBD by that department. Looking forward to all the new members and we will have the first meeting in September.

ACTION ITEMS TO BE COMPLETED:

- Taylor- Email Out Agenda one week prior to next meeting.

Adjourned at 1145

Next meeting is scheduled for Thursday, September 6th @ 1100.

Lined up for Safety in 2018
